90 - A-

Great work Jarod! You clearly understood the assignment, and took it to the next level with the storing of previous games. One note - it seems as though there is a logic error in the code, on line 58 'scissors' is spelled as 'scissor', which makes the only possible results after the user chooses paper to be a win or a tie. Make sure you're checking spelling, sometimes its just the little things! Otherwise this is a great submission, keep up the good work!
